# OVERVIEW

## 1-Day Computer-Guided Implant Dentistry with WORKSHOP

A personalized surgical guide is the link between implant planning and actual surgical insertion. It makes sure that you perform the procedure precisely, safely and according to the treatment plan.

You can “virtually” prepare for the surgery to the greatest detail and your patient will receive a much safer and more comfortable treatment. Treatment planning software gives the implant dentist 3D information about the anatomy, the bone density and the existing pathologies (if any) that can not be detected on a 2D imaging.

NO SURPRISES, MAXIMUM COMFORT,  
YOUR VIRTUAL PLANNING BECOMES

# REALITY

# PROGRAM TOPICS

Learn how to evaluate all anatomic landmarks pertinent to implant surgery (IAN, mental foramen and its loop, submandibular fossa, maxillary sinus, incisive canal, and more)

- Understand the use of computer-aided diagnosis and treatment planning.
- Learn how to perform a computer-guided treatment planning and the process and the protocol of ordering computer-generated surgical guides and performing computer-guided implant surgery.
- Appreciate the advantages and disadvantages of all 3 types of the computer-generated surgical guides (tooth- supported, soft tissue-supported and bone-supported).
- Recognize the advantages and use of special guides such as bone reduction guide and Zygoma guide
- Learn the dual scan protocol
- Recognize the advantages of using immediate smile protocol
- Learn the protocol & the indications

## PROGRAM INCLUDES

- » Certificate of attendance
- » Continuing education credit (CE credits are approved by the California Dental Board, ADA and the AGD)
- » Course manual
- » Research articles
- » Special product discounts
- » Continental breakfasts, lunches and refreshments

## Hands-On Training

Doctors will have ample amount of time during the hands -on portion of this didactic training to master all the features of the software and the concept of computer-guided implant surgery.

**Please bring your notebook  
computer to class.**
