

# **TOOTH EXTRACTION & ORAL SURGERY**

**for the General Dentist**

**Miami - September 29-30, 2012**

# Course Overview

This two-day course is designed to teach general dentists basic surgical concepts and techniques. Whether you are new to the profession or a veteran dentist, you will learn how to effectively manage a variety of oral surgery situations typically faced in your practice.

The course instructor is Dr. Gomez, Professor of Oral/Maxillofacial Surgery at the University of Miami School of Medicine where he is a full-time faculty member. His scope of practice includes Dento-Alveolar Surgery, Maxillofacial

Trauma, Oral Pathology, Reconstruction, Orthognatic Surgery, and Ambulatory General Anesthesia.

# Topics Covered

## IN THIS COURSE, YOU WILL LEARN HOW TO:

- Conduct comprehensive, pre-operative patient evaluations
- Effectively manage medically compromised patients including those taking bisphosphonates
- Prescribe commonly-used oral surgery medications
- Use effective local anesthesia techniques
- Design flaps and manage tissue more effectively
- Utilize the newest instrumentation for atraumatic extractions and dento-aveolar surgery
- Effectively retrieve root tips
- Efficiently and safely manage extraction complications

# Program Schedule
